

	Optional – colour the squares	Fraction <small>(convert to a unit fraction where the numerator is 1)</small>	Decimal	Percentage
Example		$\frac{50}{100}$ $\frac{1}{2}$.50	50%
Jervis \$2,000 contribution \$10,000 income 				
Ernabella \$2,000 contribution \$100,000 income 				

1. Explain how each representation for one character represent the same amount.
2. Represent each decimal and unit fraction on a number line.
3. If another member of the community who earned \$25,000 per year was asked to contribute 1/4 of their income, how much would they contribute? Show your working.
